C++ Developer

Camlin Technologies Ltd designs, manufactures and supplies a range of innovative products to the power and rail industries and we are looking to hire experienced and ambitious professionals with proven C++ development experience.

Requirements:

- Good knowledge of OOP
- Proven experience with C/C++ development: 3+ years
- Familiar with programming best practices, design patterns, be able to write accurate code and unit-tests
- Strong background in C/C++ on UNIX platforms (user-level) including multi-threaded programming, network programming, database programming; kernel-level development is a big plus.
- Familiarity with communication protocols: TCP/IP, FTP, CAN bus etc
- Perfect candidate is familiar and is experienced with microcontroller/embedded programming
- BSc/MSc in Computer Science or related field
- Self-motivated, proactive, responsible and passionate person
- Good knowledge of English language: speaking and writing.

We offer:

- Competitive salary
- Exciting & challenging projects
- Flexible holiday schedules

On a day to day basis, you will be working on the full product (development) life cycle to ensure projects are completed on time. The successful candidate will be working alongside teams from multinational locations.

To apply please respond with a recent copy of your CV in English to: **v.oglinda@camlintechnologies.com** and **a.moore@camlintechnologies.com** Subject: Moldova C++ developer
